

COLOUR GUIDELINES

Although various guidelines state that the workplace aisles and passageways are to be marked, the requirements are often non-specific with regard to size, colour and wording of markings.

Whilst there is considerable scope for variation we believe this is a useful starting point for defining the colours for marking floors.

In addition to the colours often quoted in guidelines we also offer custom colours, fluorescent and photoluminescent options.

Yellow		Caution Aisle ways and Traffic lanes
Red		Danger. Stop. Fire. Stop signs. Fire safety signs
Blue		Information. Equipment under repair Informational signage. Equipment is under repair
Green		Safety First Aid. Safety information
Orange		Warning. Dangerous Machinery Machinery
Black/Yellow		Construction Equipment Health hazards. Extra caution to be taken
Red/White		Areas to be kept clear for safety/ compliance reasons Emergency access points. Electrical panels
White		Production Production ongoing
Black		Finished Goods Highlighting
