PermaRoute®

UNIQUE, INSTANTLY APPLIED FLOOR MARKING SYSTEM

Messages can be placed in high traffic areas - the design is printed beneath a protective laminate and won't wear off

Multi-pallet bays help logistics planning - the durable components can withstand sustained fork-lift traffic

Any irregular shape can be easily defined - use colour and shape to designate working areas

PermaRoute is the world's only complete floor marking system. Over many years we have developed the range to encompass every section of floor marking for factories, warehouses, assembly areas and logistic bases.

With PermaRoute® you're not restricted to simple lines. It's a versatile system which allows you to develop a clear set of visual aids to ensure that your facility not only looks clean and efficient but also helps your process controls.

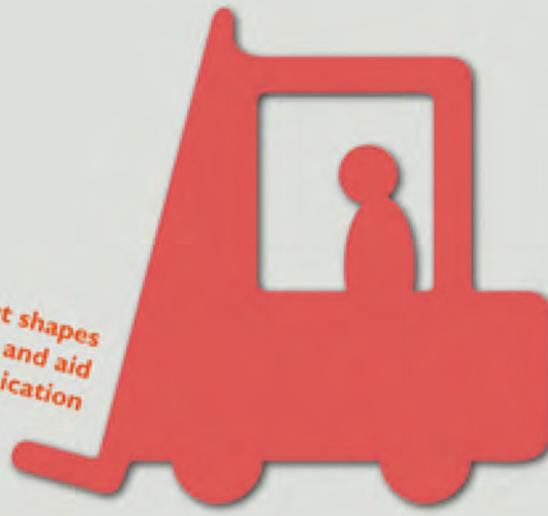

PermaRoute can be created bespoke to suit your requirements, as you can see from the range breakdown we produce lines, angles, joins, shapes and outlines in all industry standard colours. Our team are experts in specification and can provide advice that has been gathered with dealing with companies as varied as aerospace, automotive, logistics and defence to name but a few.

Custom components can be created to your specification further expanding the possibilities making PermaRoute® a site wide floor marking solution.

Custom cut shapes
grab attention and aid
communication

What preparation is required?

Hardly any, the surface merely needs to be clean, dry and free from grease, on porous surfaces they may need priming prior to application, our team are always happy to help with knowledgeable advice.

What advantages does it hold over paint and resin marking systems?

Major advantages! Unlike liquid systems ours is instantly applied, the area can be used immediately afterwards, if a colour coded area changes with new aisle marking required then ours can be removed clean as it won't snap or fracture and, this is really important for food preparation or pharmaceutical areas, there are no fumes or solvents generated.

Is it durable?

Absolutely, this is a 700mu thickness, vastly different to anything else.

I have a large site, is there a really fast way of applying it?

Our custom made applicator is available to buy or hire. It makes the task of laying long lines quick and easy. The applicator packs flat to aid shipping.

We want to be able to display our corporate colours throughout our warehouse, as you are a manufacturer is this something you can create?

Very easy and something we do on a weekly basis, we can match to any RAL, Pantone or NCS, please enquire for MOQs etc.

How can I see it?

We enjoy sending samples, we want you to see this unique product, please contact us and we will immediately dispatch a sample pack

We have PermaRoute® available in many stock colour choices but, depending on order quantity, we can also match to Pantone or RAL colour formats.

PermaRoute®

UNIQUE, INSTANTLY APPLIED FLOOR MARKING SYSTEM

PermaRoute can be used to define irregular shaped areas - the selection of joints and angles make it easy to achieve a professional finish.

Once fitted, PermaRoute is durable and effective.

Custom messages and text aid clear communication. This is perfect for helping new staff and visitors become quickly familiar with your facility.

A simple bay system aids workflow without the need to build easily damaged physical barriers.

PermaRoute®

UNIQUE, INSTANTLY APPLIED FLOOR MARKING SYSTEM

PermaRoute Yellow and Black Hazard - one of the simplest and most recognised methods of defining safety critical areas.

All PermaRoute products are easy to apply. The thicker profile of PermaRoute means that it's possible to lay straight lines by hand.

For longer lines, our custom made applicator is available for sale or hire. Entire buildings can be quickly and cleanly fitted with the PermaRoute floor marking system.

PermaRoute can be used in clean rooms and food safe areas.

PermaRoute®

UNIQUE, INSTANTLY APPLIED FLOOR MARKING SYSTEM

PermaRoute floor markings are easily removed without damage to the floor surface making it simple to apply temporary markings or revise your floorplan.

A variety of stock designs can be used to increase the effectiveness of your way-marking plans.

Everyone understands a Zebra Crossing! Make the use of safe passageways instinctive with these instantly recognised features.

People can't resist the urge to follow a line. The bold, broad lines of PermaRoute walkway encourages pedestrians to stay within the designated areas.
